Most of the fashion trends for eyewear come from characters in movies and at [Yates and Suddell](#), eyewear is a big deal. The [Iconic Movie Glasses](#) infographic has 12 of the most memorable pieces of eye wear to hit the big screen all on one page !

*We're all about eyewear here at Yates & Suddell. Whether a stylish pair of spectacles or a sharp set of shades, the right glasses can really complete your look. Just ask the costume designers to the stars, who have long relied on a pair of specs to lend their subjects a certain "je ne sais quoi". These glasses often become iconic aspects of the movies in which they appear, and can end up influencing frame fashion for years to come.*

*Check out our new infographic to see 12 of the most iconic pairs of glasses to ever grace the silver screen. How many do you recognise ?*

*Of course, most of these frames are now many years old, so you'll be very lucky to track down a pair of originals. However, you'll find that many of today's frames are based on the same iconic shapes as the most popular of these glasses, making it easy to recreate the style of the star you love the most !*

Fantastic topic idea for an online retailer of eyewear. The design is eye-catching, with minimal text and the illustrations are easily recognizable.

The footer should include the URL to the infographic landing page, so when people find this infographic on other sites, they can easily find the full-size original.

Thanks to Matt for sending in the link !
