As children, we viewed the world through the lenses of our imaginations. The carpet became lava, the shadows formed monsters, the family minivan was a spaceship. But the older we got, the more reality set in, and soon we forgot the magic our minds could create. We invite you to step back into your childhood and take a look through the lens once again. nahue and Roth Rind, that takes you on a journey through the mind of a 10 year old boy living in the 80's and 90's.
