Leonardo Da Vinci, the 15th-century Renaissance man, is credited with envisioning or outright inventing hundreds of modern-day devices ; facsimiles of everything from a machine gun to parachutes and even today's helicopter can be found in his detailed drawings

The schematics and notes he left behind are a treasure trove for researchers, including Dr. Burt Wilde. The University of Illinois researcher says he's discovered evidence that the first design for something very much like [Google Glass](#) was created by the master himself.

"The drawing is rudimentary, but the text and notation are unmistakable," said Wilde in a phone interview [Read more...](#)
