Drying bras is more complicated than you think. Pop them in the dryer and ruin the delicate pieces. Hang them on a line and you'll have to wait for hours. Luckily, one man has found the solution to our intimate first world problem with Ricasol, a bra dryer that solves your undergarment woes

Using an infrared light to warm up the fabric, [Ricasol](#) evaporates moisture and preserves the garment's shape. To help maintain form, the warm air is close to human body temperature. The breast-shaped device dries your bra in 20 to 30 minutes on a flat surface and comes in a range of sizes
