Which Flu Virus ?

A new deadly strain of "bird flu" - coded H7N9 - [has broken out in the Shanghai area of China.](#)

Is it more deadly than H5N1 ? H1N1 ? H7N7 ? Or H2N2 even ?

We weren't sure. So we took a look [at the data](#) and... well, you can guess the rest.

[See the visualisation](#)

All the data, complete list of flu strains and extra background information : http://bit.ly/KIB_influenza
